SUMMARY

A driven Information Science student proficient in C and Python, with a focus on web development and emerging technologies. Skilled in developing, debugging, and optimizing code to solve real-world challenges through innovative solutions. Eager to expand industry knowledge, enhance technical skills, and embrace diverse opportunities in dynamic environments.

EDUCATION

Bachelor of Engineering – Information Science & Engineering	2022-Present
<i>Mangalore Institute of Engineering & Technology, Moodabidri</i>	CGPA:8.25
Senior Secondary (12th)	2020-2022
<i>Rotary Pre-University College, Moodabidri</i>	
Secondary School (SSLC)	2019-2020
<i>Rotary English Medium School, Moodabidri</i>	

TECHNICAL SKILLS

Programming Languages	: C, Python.
Interface	: HTML, CSS.
Database	: MySQL.
Tools	: VS code, GitHub, MS Office, Postman, Figma.

PROJECTS

Class Attendance Register System	May 2024
Developed a robust Class Attendance Register System using C to streamline attendance for management and classes, subjects and students. The System employs efficient data structures and file handling to provide persistent storage and retrieval capabilities.	
School Website Design (Frontend Only)	September – November 2024
Designed a static school website using HTML, CSS and JavaScript to provide essential information and interactive features. The website focused on clean design, intuitive navigation and functional user interaction without responsive layout.	
Skin Condition Analyzer – Group Project (4 members)	February 2025 – Present
The Skin Condition Analyzer is an skin diagnostic system designed to evaluate skin concerns using either image input or symptom descriptions. It detects issues such as acne, dryness, irritation etc through data analysis. The tool provides tailored home remedies based on natural ingredients and offers recommendations. It also suggests appropriate home-made remedies and over-the-counter remedies to support recovery. The goal is to help users make smart skincare choices through easy-to-use, scientifically supported advice.	

COURSES & WORKSHOPS

- Course on “**Responsive Web Design**” -FreeCodeCamp, 2024
- Course on “**RPA Developer Foundation (v2020.10)**” -UiPath Academy, 2024
- Course on “**The Complete Oracle SQL Bootcamp (2024)**” -Udemy, 2024
- Course on “**Salesforce AI with Agentforce Foundations – Champion (Level 1)**” – Salesforce Trailhead, 2025
- Course on “**JavaScript Course With Certification: Unlocking the Power of JavaScript**” –Scaler Topics, 2024
- Course on “**Postman API Fundamentals Student Expert**” –Postman, 2024
- Course on “**Data Analytics Job Simulation**” - Deloitte (via Forage), 2025
